

Furniture and Fit-Out Renewal for Libya's Public Buildings

A measured design, procurement, installation, handover and technical service model for hotels, hospitals, social facilities, guesthouses, offices, dining halls and outdoor areas.

Design

Fit-out execution

Furniture supply

Technical service

Public-building renewal becomes operational through the right furniture

Bereket Afroline proposes more than product supply for Libya's public assets: one accountable model for survey, design, selection, procurement, installation, handover and service.

Single owner

Survey, measuring, design, selection, procurement, installation and service are managed together.

Public scale

Hotels, hospitals, social facilities, guesthouses, offices and outdoor spaces are handled under one logic.

Durability

Surfaces, bases, chairs, beds and spare parts are selected for intensive use.

Service routine

After handover, maintenance, replacement and technical interventions are recorded.

Core promise

Public decision makers receive more than a product list: an implementation timeline, space standard, service responsibility and sustainable maintenance model.

End-to-end furnishing management from design to technical service

For every building type, function, durability, cleaning, comfort, stock and maintenance needs are planned together.

Survey & measure

Existing spaces, usage intensity and furniture needs are mapped on-site.

Design

Layout, material, colour and use scenarios become a decision file.

Product selection

Suitable product families and alternatives are selected from partner catalogues.

Procurement

Products, accessories, spare parts, logistics and stock planning are managed.

Execution

Installation, placement, quality checks and handover are delivered on-site.

Technical service

Maintenance, adjustment, replacement and service records ensure continuity.

Renewal plan

Existing furniture inventory, priorities and budget sequence are reported.

Handover file

Product lists, room/area plans, warranty and service ownership are delivered.

Raising hotels, hospitals and social facilities to one standard

A measurable renewal approach for public hotels, hospitals, social facilities, guesthouses, dining halls, offices and outdoor areas.

Hotel & guesthouse

Rooms, beds, lobby, restaurant and terrace furnishing.

Hospital

Waiting, companion, administrative and dining areas.

Social facility

Dining, meeting, training and event layouts.

Public office

Workstations, meeting, archive and waiting areas.

Outdoor areas

Gardens, terraces, poolside and rest areas.

Technical areas

Durable table bases, surfaces and service parts.

Survey, design, select, procure, install and service

A clear plan for decision makers; comfortable spaces for users; durable and serviceable furniture systems for operators.

01

Survey

Building, room and shared-area measurements, current furniture status and usage intensity are mapped.

02

Concept

Colours, materials, seating capacity and product standards are defined by function.

03

Sample area

A selected room, floor or social area becomes a tangible decision sample.

04

Procurement

Product families, logistics, accessories and spare-part plans are tied to site needs.

05

Installation

Assembly, placement, quality checks, photo handover and punch lists are managed.

06

Service

Technical interventions, part replacement, maintenance and renewal records are kept.

Selectable furniture families from one room to a full facility

Beds and room sets, tables and chairs, waiting areas, restaurants, outdoor areas, technical table bases, surfaces and spare parts are planned together.

Beds and rooms

Hotels, guesthouses and staff accommodation

Tables and chairs

Dining halls, restaurants, offices and meetings

Waiting areas

Hospitals, public offices and social facilities

Outdoor areas

Gardens, terraces, poolside and rest areas

Technical components

Table bases, surfaces and spare parts

Material selection

Colour, texture, durability and cleaning

Room, lobby, restaurant and terrace renewal with consistent quality

Guest experience, easy cleaning, durable surfaces and after-service follow-up belong to the same project.

Hotel renewal package

- Room bed, headboard, bedside and textile compatibility proposal
- Lobby, restaurant, meeting and outdoor furniture standard
- Easy cleaning, fast replacement and heavy-use criteria
- Floor-by-floor execution and staged handover plan

Service tracking

Post-handover records

Operational ease

Cleaning and replacement

Guest experience

Comfort and visual quality

Durable solutions for waiting, administration, dining and companion areas

In hospitals, furniture is not only appearance; it is hygiene, circulation, waiting comfort and maintenance ease.

Waiting and circulation

Cleanable, replaceable seating systems for intensive use.

Administrative areas

Consistent standards for offices, meetings, registration and reception.

Dining halls

Durable tables/chairs, service ease and capacity planning.

Companion and rest areas

Product choices for comfort, hygiene and long use.

Parts and maintenance

Table base, surface, connector and spare-product tracking.

Scalable furnishing for dining, meetings, events and gardens

Public facilities return to operation faster with product families designed for heavy use, replacement and easy service.

Heavy-use standard

- Fast-to-install dining, meeting and event layouts
- Weather-resistant selection for gardens, terraces and outdoor areas
- Product families that are easy to replace under heavy use

Garden

durable outdoor use

Meetings

modular tables/chairs

Dining

capacity and flow

Events

fast setup

Show committees a completed-space feeling, not only individual products

Visuals selected from partner catalogues make the renewed public-building experience tangible.

Hotel room

Cafe/social area

Outdoor area

Meeting/dining table

Event chair

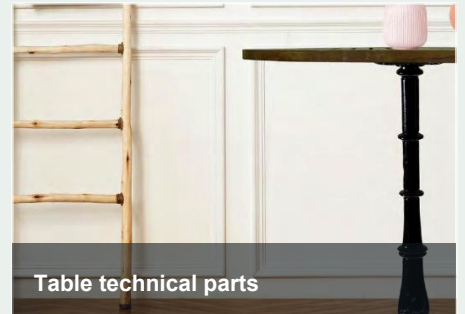

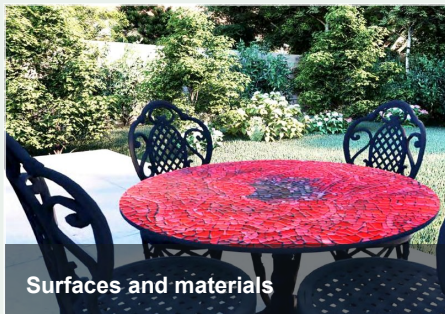

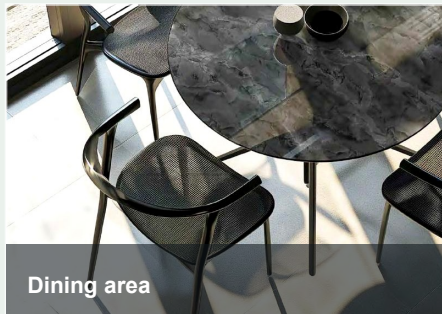

Table technical parts

Surfaces and materials

Dining area

Colour chair family

Visual clarity before decision

Visuals are representative of area types that can be delivered with selected partner product families.

From pilot area to nationwide public-building network

Start with one building, one floor or one social area; establish survey, design, sample installation, handover and technical service routines.

0-30 days

Survey and decision file

Measurements, existing inventory, area function, visual direction and budget class are prepared.

31-60 days

Sample installation

A sample layout and product choice are delivered for one room, floor, waiting area or dining hall.

61-90 days

Handover and service routine

Installation, photo handover, punch list, spare parts and technical service records are established.

Pilot offer

- Define a sample area in one public building
- Measured design and product-family selection
- Sample installation and committee presentation
- Procurement, installation, handover and service plan

When the space is renewed, the service becomes visible.

Bereket Afroline Foreign Trade Inc. is ready to undertake design, procurement, fit-out execution and technical service responsibilities for furniture and furnishing renewal projects in Libya's public buildings.

-
- Measured design, procurement, installation and technical service for public buildings
 - Coverage for hotels, hospitals, social facilities, guesthouses, offices, dining halls and outdoor areas
 - Selectable, durable and serviceable solutions from partner product families
 - Scalable model from pilot installation to nationwide renewal programme
